

**Boötes**, a new Danish Design Brand is launching with a collection of LED lamps, crafted from natural materials, hand made in Denmark. "Sky map" pictured here is representative for the Limited edition collection. Boötes (pronounced /boʊ'ooti:z/) was founded from the desire of bringing the best, most natural light indoors, once the sun sets down. We achieve this by using the best lighting technology COB LED (Chip on Board LED's) paired with wood, stone in a Nordic Minimalist design context. We offer beautifully handcrafted lamps, a connection with nature, and a remarkable light experience, through the use of natural materials and outstanding light quality.

Gabriel Sas founded the company with the aim of bringing a fresh view on Lighting design market, based on the principle of combining natural materials and technology, focusing on the consumer experience and craftsmanship.

The moments we share.
