

## RESIM

Laura Jungmann und Jonathan Radetz

Laura Jungmann studied product design at HFG Karlsruhe and ITÜ Istanbul. Since 2013, she is self-employed as a product and graphic designer and works in a shared studio in Karlsruhe. After graduating, she founded the glass label SAMESAME: In collaboration with glassmaker Cornelius Réer she designs and markets a collection of reshaped industrial glass bottles. Together with other German Designers, she founded the social design project ISTANBUL'DAN in 2015, in whose context she met Produkt-designer Jonathan Radetz and created the lamp RESIM in 2017.

Regional, ecological and social aspects, as well as the love of crafts and materiality determine Laura Jungmann's work.
