

ELECTRIFYING PLACES ILLUMINATING SPACES

Light + Building 2026 takes place under the motto “Be Electrified – Electrifying Places. Illuminating Spaces.” It highlights how electrification and digitalisation are shaping the lighting and building-services technology sectors. “Electrifying Places” refers to the development and networking of urban environments, the efficient electrification and safeguarding of buildings, as well as the transition towards sustainable energy supply. “Illuminating Spaces” focuses on the design aspects of lighting.

Building on this, the three top themes of Light + Building illustrate the developments that are driving the industry. “Sustainable Transformation”, “Smart Connectivity” and “Living Light” mark the key fields of action – from climate-friendly energy supply and digital networking through to the atmospheric qualities of light. They demonstrate how technological innovation, architectural design and system integration can merge into holistic solutions, providing orientation in a rapidly changing market.

Alongside this, a comprehensive event programme takes place:

FACTSHEET

8 to 13 March 2026

8 to 12 March 2026: 9.00 – 18.00
13 March 2026: 9.00 – 17.00

Messe Frankfurt GmbH,
Ludwig-Erhard-Anlage 1, 60327 Frankfurt am Main, Germany

Visitors: 151,192 from 146 countries (2024)
Exhibitors: 2,169 (511 from Germany and 1,658 international) (2024)

Visitor groups: Architects, interior architects, engineers, planners, lighting planners and designers, building fitter, security technology, overall structural planner, industry, trade, public-sector authorities and facilities, energy consulting, educational institutions, utility companies, wholesale and retail, electrical engineering and installation technology, building system integrators, solar installations, facility management and real estate industry
